

AQUADRAFT™

WATER CONDITIONER & SURFACTANT

Principal Functioning Agents:

Ammonium sulfate and alkyl polyglucoside	50.5%
Constituents ineffective as spray adjuvant	49.5%
Total	100.0%

DIRECTIONS FOR USE

AQUADRAFT is an adjuvant combination specifically formulated for use with herbicides, defoliant and desiccants whose activity or stability in solution is enhanced by the addition of ammonium sulfate. The high quality, liquid ammonium sulfate in this product will reduce nozzle tip plugging associated with the use of dry ammonium sulfate. This product may be used on agricultural, aquatic, forestry, turf and ornamental, industrial and non-cropland sites.

Read and follow the precautions, restrictions and recommendations on the labels of pesticides used with AQUADRAFT. Use according to the most restrictive label directions for each product in any tank mix.

COMPATIBILITY: AQUADRAFT is compatible with most pesticides. However, if the desired combination has not been previously used, a compatibility test is recommended.

MIXING: Shake well before using. Fill spray tank half full of water and begin agitation. Add recommended amount of AQUADRAFT. Add products as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersible granules, (2) Wettable powders, (3) Flowables, (4) Solutions, (5) Emulsifiable concentrates. Continue agitation until spray solution is completely mixed. Continuous agitation of finished spray is recommended. If spray solution has been allowed to stand, thoroughly agitate and remix before application. Thoroughly rinse the spray system with clean water after use to reduce corrosion.

RECOMMENDATIONS: Specific use rates will vary with conditions of application such as water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

AIR or GROUND: AQUADRAFT contains 3 pounds ammonium sulfate per gallon. When used at a rate of 2.5-5 gallons per 100 gallons of finished spray solution, it provides 7.5-15 pounds ammonium sulfate. For improved efficacy, use at least 2 quarts per acre when finished spray volume is less than 20 gallons per acre. For backpack or hand held sprayers, use 3.2-6.4 fl oz per gallon of finished spray solution. When using a concentration greater than 2.5%, salt burn may occur on sensitive crops. If desired tank mix has not been used before, test applications to part of the crop are advisable to assess potential phytotoxicity before full scale, commercial applications.

KEEP OUT OF REACH OF CHILDREN

WARNING

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes serious eye irritation. Wear protective eyewear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

Do not contaminate water when cleaning equipment or disposing of equipment washwaters. Avoid release to the environment.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store away from incompatible materials. Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrcycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

LIMITED WARRANTY: Meristem Crop Performance ("MCP") warrants that the Product conforms to the chemical description given on this label and is reasonably fit for the purpose stated when used in accordance with label directions under normal conditions of use. MCP and Seller make no other warranties, express or implied, including warranty of merchantability or fitness for a particular purpose. Buyer and User accept all risks arising from any use of this Product. To the extent allowed by law, MCP and the Seller shall not be liable to the Buyer or User of this Product for any consequential, special, incidental or indirect damages.
