

RACEREADY™ COMPLETE SEED TREATMENT

Put Plants on the Fast Track to Higher Yields

MAKE SURE YOUR SOYBEANS ARE RACEREADY™

RACEREADY™ Complete seed treatment from Meristem Crop Performance™ gives your soybeans unsurpassed protection against harmful early-season pests through a best-in-class fungicide and insecticide package. Combined with a unique blend of inoculants, biologicals and polymers, RACEREADY™ Complete drives exceptional early-season plant health and plantability. All at a value that just makes sense.

YOUR CHOICE IN SOYBEAN SEED SHOULDN'T DICTATE YOUR CHOICE IN SEED TREATMENT

RACEREADY™ Complete allows you to buy your seed treatment based on its total agronomic value for disease and insect protection. Above that, RACEREADY™ Complete offers a proprietary triple-stack inoculant, a proprietary liquid Trichoderma biological for better root development and starch-based extender/polymers for easier planting. For top performance and value pricing that leaves the competition in the dust, run with RACEREADY™ Complete.

PACKING OPTIONS, USE RATE & APPLICATION INSTRUCTIONS

RACEREADY™ Complete is a co-pack. The co-pack (Part A) is a liquid premix available in a 30 gallon mini-drum. The pre-mix contains the fungicide, insecticide, FloRite¹ and a colorant. The application rate for the premix is 2.12 oz per 50 lb of soybeans.

The second component of the co-pack (Part B) is a case that includes three separate parts:

- 1 bladder containing the inoculant
- 2 cylinders of the liquid Trichoderma
- 2 cylinders of the extender/polymer

The application rate for the biological components is 0.775 oz per 50 lb of soybeans.

See reverse side for additional information, use rate and application instructions.

ACTIVE INGREDIENTS PER CWT

FUNGICIDES

Fludioxonil*	4#	0.08 oz
T-methyl*	4.5#	0.28 oz
Metalaxyl*	2.65#	0.75 oz

INSECTICIDE

Imidacloprid*	5#	1.60 oz
---------------	----	---------

ROOT ENHANCEMENT

Bradyrhizobia Inoculant	1.10 oz
Trichoderma	0.20 oz

PLANTING EASE

Extender/Polymer	0.25 oz
Flo-Rite 1706 ¹	0.80 oz

* EPA registered active ingredients

Colorant	0.74 oz
----------	---------

AGRONOMIC BENEFITS

Fludioxonil: a non-systemic fungicide with control of Rhizoctonia damping off, rhizoctonia seed rot, pythium, phytophthora and fusarium

T-methyl: a systemic fungicide with control against rhizoctonia damping off and phomopsis

Metalaxyl: a systemic fungicide used to control pythium damping off and phytophthora

Imidacloprid: a systemic insecticide proven to effectively protect beans from a broad range of harmful insects

Bradyrhizobia Inoculant: an inoculant including three proprietary strains that accelerate early-season nodulation for maximum nutrient uptake

Trichoderma: an active biological that creates more robust root systems and improves photosynthetic efficiency

Extender/Polymer: starch-based (non-sticky) extender reduces bridging and improves on-seed life of Bradyrhizobia and overall performance

Flo-Rite 1706¹: a polymer coating designed to improve plantability, reduce dust-off of actives, and improve seed flow

MERISTEM

CROP PERFORMANCE

1-833-637-4783 (MERISTEM)

All RACEREADY™ recommend use rates are based on treating a 50lb unit of soybeans with an estimated 140k seeds per unit. The table below provides use rates:

Co-Pack Component	Use Rate Per 50lbs of Soybeans
Part A Fungicide/Insecticide Pre-Mix	2.12 oz
Part B Inoculant, Trichoderma, Extender/Polymer	0.775 oz

The following tables outline the approximate number of units that different packaging options treat:

Co-Pack Component	30 Gal Mini-Drum (Part A)	4 Cases (Part B)
50 lb Units	1800	1800

APPLICATION INSTRUCTIONS

RACEREADY™ Complete is an all liquid system designed for use in a liquid tank mix in commercial seed treatment systems. For the **Part A** components of the Co-pack, connect the mini-drum or tote to the slurry tank and set system to apply product at the suggested use rate.

For **Part B** of the Co-pack:

1. Prior to adding to the tank, shake well all components (liquid rhizobia, extender, liquid Trichoderma).
2. All components (liquid rhizobia, extender, liquid Trichoderma) are to be used together.
3. Gradually pour components into non-chlorinated water.
4. When all three components are combined the mixture is ready to apply. Connect container to the inoculant and biological application port that bypasses the atomizer on most commercial seed treaters.
5. Once mixed, use immediately.

Treat no more than 120 days prior to planting.

NEW SOYBEAN GROUND OR ADVERSE CROP CONDITIONS

Recommendations for Adverse Conditions or New “Virgin” Soybean Fields – If soil has not hosted the specific legume for more than three (3) years; Soil pH is less than 5.8 (pH should be adjusted by liming prior to inoculation); Soil pH is more than 8.5; Soil organic matter is less than 1.5%; Drought or flooding has occurred; Topsoil conditions exceed 80° F; Soil erosion, or with the use of soil treatments and chemicals injurious to soil bacteria and inoculants, to **Maximize Soybean Yield Potential:** When planting soybeans under the conditions listed above, it is recommended to apply a double (2X) rate of inoculants.

Achieve a 2X inoculants rate as follows:

- a. Apply a 1X rate of RACEREADY™ Complete no more than 30 days prior to planting.
- b. Additionally, apply at planting, a 1X rate of a sterile peat inoculant.

STORAGE INSTRUCTIONS

Protect RACEREADY™ Complete from excessive heat. Store in a cool place between 40° and 77°F, out of direct sunlight. Do not allow to freeze. Open packages only when ready to use. Use entire contents after opening.
