

HOMESTRETCH® Fe 2.1% EDDHA NUTRITIONAL

GUARANTEED ANALYSIS:

Iron (Fe) 2.1%

Derived from iron EDDHA.

GENERAL INFORMATION

HOMESTRETCH® Fe 2.1% EDDHA is a fully chelated solution recommended for the prevention and/or correction of iron deficiency in all crops when used as a part of a balanced fertility program.

RATE RECOMMENDATIONS

Soil Application: HOMESTRETCH Fe 2.1% is recommended for use on all types of soils. Because this is a concentrated solution, it should be diluted before use to ensure uniform coverage. Soil applications may be made by drip, sprinkler or furrow irrigation systems or in band or broadcast fertilizer applications. For trees or individual plants, the product may be diluted as above or sprinkled directly on the soil uniformly under the plant's drip line, then watered in. NOTE: The rates given below are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result.

RECOMMENDATION FOR USE IN

ROW CROPS:

In-Furrow or Banded Applications: Mix 1-5 qt/A of product in water and apply in-furrow application at 2-10 gallons of total solution per acre. Higher water volumes in the rate range allow for easier mixing and complete dispersion of the product.

Foliar Application: Avoid applying this product when plants are suffering from moisture stress. If there is any doubt, apply the spray solution to a small test area of the crop or foliage to assess any undesirable effects or phytotoxicity before general application.

Fruit, Tree and Vine Crops: Apply 2-10 quarts per acre or 1 to 4 Tbsp per inch of tree diameter.

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and general health. For best results, follow soil/tissue test recommendation.

MIXING AND HANDLING INSTRUCTIONS

HOMESTRETCH Fe 2.1% mixes readily with water. Agitation is recommended to help disperse product completely in water. If adding directly to a tank without agitation, add the product extremely slow to the water tank to allow complete dispersal into solution.

FERTILIZER COMPATIBILITY: HOMESTRETCH Fe 2.1% Fe does not mix directly into all fertilizer solutions. Always conduct a jar test prior to mixing with any other fertilizer. Compatibility with fertilizer solutions can be improved by diluting the fertilizer solution with water.

PRECAUTIONARY STATEMENTS

Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling.

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store locked up. Dispose of contents/container in accordance with local regulations..

LIMITED WARRANTY: Meristem Crop Performance Group, LLC, warrants that the Product conforms to the chemical description given on this label and is reasonably fit for the purpose stated when used in accordance with label directions under normal conditions of use.
