

MERISTEM FEATURED PRODUCTS

RACEREADY™ SEED TREATMENT PORTFOLIO NOW WITH MEFONOXAM

PRODUCT LIST

HOW THE PRODUCT WORKS

The **RACEREADY** product line is a custom blend of conventional chemistries known for control of common fungal and insect pressures on seed. Meristem specifically chose the actives used in **RACEREADY** products to provide a broad spectrum, bulletproof offering that pairs well with the biological treatments being used on the seed and in the planter box. All **RACEREADY** blends use a combination of systemic and free-living actives while stacking modes of action to ensure the seed has all it needs for a healthy start and reaching its maximum potential.

WHY FARMERS USE THE PRODUCT

RACEREADY is unlike most competitive products by stacking technologies from multiple basic suppliers and coupling them with polymers and colorants that are safe for the biological treatments being used on the seed and in your planter box. As a farmer working with Meristem, you get the assurance of a strong start with healthy seeds and the unsurpassed convenience of conventional chemistry all-in-one offering.

TESTIMONIAL

Adam Conrad, Axis Ohio, Marion, OH

"We have used **RACEREADY** seed treatment for several years now. The products have been extremely easy to use in the pre-blended formulas and our customers can rest assured they are getting a premium product to protect the investment they have made in our seed."

COMPLEMENTARY MERISTEM PRODUCTS

MORE BUSHEL FOR LESS

PUT PLANTS ON THE FAST TRACK TO HIGHER YIELDS

With three different fungicides and an insecticide, RACEReady F+I gives you broad spectrum disease and insect protection.

PRODUCT BENEFITS

- **Protection against early-season disease and insects**
- **Best-in-class fungicide and insecticide package**
- **Polymer proven to reduces dust-off and improve plantability**

AGRONOMIC BENEFITS

SeedWorx: a polymer coating designed for uniform coverage and reduces dust off, excellent seed flow, shiny quality finish with high opacity, and WOW factor appearance.

ACTIVE INGREDIENTS PER CWT

FUNGICIDE

Fludioxonil*	4#	0.08 oz
T-methyl*	4.5#	0.28 oz
Mefenoxam*	4.1#	0.23 oz

INSECTICIDE

Imidacloprid* 5# 1.60 oz

PLANTING EASE

SeedWorx.....	0.60 oz
Colorant	0.70 oz

**EPA registered active ingredients*

USE RATE & APPLICATION INSTRUCTIONS

The application rate for the pre-mix is 2.12 oz per 50 lb of soybeans. Simply connect the keg to the slurry tank and set system to apply product at the suggested use rate.

PRODUCT AVAILABILITY

- 15-gallon keg
