

METALAXYLST

METALAXYL ST is a systemic fungicide that contains the chemical metalaxyl, which interferes with fungal RNA synthesis. METALAXYL ST is intended for use as a planter box treatment in combination of broad-spectrum fungicide.

MODES OF ACTION

Metalaxyl is one of the best systemic fungicides against oomycetes. It is widely used as a soil or seed treatment for the control of pythium and phytophthora seed rot and damping-off, and as soil treatment for the control of phytophthora stem rots and cankers in annuals and perennials and of certain downy mildews. METALAXYL ST is water soluble and is translocated readily from roots to the aerial parts of plants.

SOYBEAN DISEASES:

Damping-off Control

- Pythium

Early Season Control

- Phytophthora

PRODUCT BENEFITS

- Metalaxyl is an industry standard systemic fungicide for phytophthora and pythium.
- Contains protective and curative properties.
- Systemic protection absorbed by the roots and translocated to the plant.
- Protects the seed and root structure during early stages.
- No resistance potential

APPLICATION METHODS

METALAXYL ST can be used as a planter box application through Meristem's patented BIO-CAPSULE™ delivery system. Please consult the product label for more details.
