

25% YIELD CAN BE IMPACTED IN-SEASON

KEY PRODUCTS AND TIMING

HIGH-YIELD SOYBEAN PROGRAM

| PRODUCT | TIMING | RATE | VALUE |
|--|--------------------------|--|--|
|   | Preplant or Post-Harvest | 32 oz/acre | EXCAVATOR® AMS is the industry's most aggressive residue management tool. Adding AMS and a non-ionic surfactant makes it the perfect partner for water-soluble burndown herbicides like glyphosate. |
|    | At Planting | 1 pail treats 40 units of soybeans at 140k seeds per unit. | RHTS is powered by BIO-CAPSULE™ Technology – a patented delivery system that allows for the addition of multiple biological solutions safely packaged for convenient deployment at planting. ETHER™ Enzyme Technology kick starts microbial activity and improves critical early phosphorus uptake. |
|   | Vegetative Stages | 2 oz/ac | REVLINE® EARLY-SEASON contains two plant growth regulators (PGRs) that promote continued root, shoot and trifoliolate development, mitigate environmental and herbicide stresses, and is to be applied during vegetative stages. |
|   | V3-R1 | 1 qt/ac | HARVESTSHIELD™ COMPLETE is a solution specifically formulated to mitigate abiotic stress conditions. By combining essential micronutrients that maximize photosynthesis with stress mitigation ingredients, HARVESTSHIELD COMPLETE allows growers to realize more value from this easy-to-use, all-in-one product. |
|   | R1-R5 | 1-2 qt/ac | HOMESTRETCH® NKB-S is a blend of potassium, boron, molybdenum and sulfur. It is ideal for in-season nutrient applications, especially during reproductive stages to enhance nutrient source to sync, supporting flower retention and pod fill. |
|   | R1 - R5 | 12.8 oz/acre | REVLINE® LATE SEASON plant growth regulator is designed to reduce stress, increase pollination and support photosynthesis, promoting flower retention and pod fill. |
|   | | 1-2 gal/100 | AQUADRAFT® EXTREME is the only true, easy-to-use water-based ammonium sulfate water conditioner, non-ionic surfactant, and oil-based drift and deposition product in one convenient jug. |
|   | | 8 oz/acre | TRUTRACK® FUNGICIDE PASS adjuvant helps optimize droplet adhesion, which reduces bounce and increases droplet spreading for improved contact, coverage and canopy penetration. |
