

HOMESTRETCH® ZINC 9% NUTRITIONAL

PUT PLANTS ON THE FAST
TRACK TO HIGHER YIELDS

HOMESTRETCH® Zinc 9% offers high quality, fully chelated EDTA micronutrients. The chelation shields and protects the nutrients, which prevents them from reacting and binding with other elements in the soil and other fertilizers. This protection helps ensure that nutrients remain available to the plant in a wide range of tank mixes, as well as pH and soil conditions.

HOMESTRETCH Zinc 9% can withstand even the most challenging soil conditions, such as high alkaline calcareous soils. It also offers superior tank mix compatibility and will perform in complex tank mix situations, such as neutralized orthophosphate solutions.

HOMESTRETCH Zinc 9% has been approved as a tank mix partner with the 2, 4-D based herbicide, Enlist Duo® with Colex-D® Technology.
