

BioUP

DECHLORINATION TANK AID

BioUP is a water pre-treatment that reverses the negative effects chlorine has on biological products. BioUP turns chlorine into the safer chloride form, which is an essential plant nutrient, and is no longer harmful to beneficial microbes.

Chlorine is added to both municipal and rural water sources to kill microbes and make it safe to drink. When you use these water sources to fill your sprayer that have been treated with chlorine, it can harm any living organisms you are adding to the tank.

PRODUCT BENEFITS

- Use with rural and municipality water sources that include biological applications
- Formulated and produced to neutralize both free and combined chlorine in water
- Provide a consistent reduction or elimination of residual chlorine without affecting water quality
- Enhances biological products success

DIRECTIONS FOR USE

Use BIOUP with:

- EXCAVATOR®
- EXCAVATOR® AMS
- REVLIN® ADVANCED
- Any other Biological products

RECOMMENDED USE RATE

BIOUP should be used at a rate of 2 oz/100 gal of water.

PACKAGING

Available in 4x1 gallon jugs.
