**PREMIUM ADJUVANT CONCENTRATE**

## PRODUCT DESCRIPTION

AQUADRAFT® C is a blend of surfactants, humectants and water conditioner (ammonium sulfate), designed to be blended with liquid AMS or tank mixed with dry AMS. AQUADRAFT C contains antifoaming agent to minimize foaming.

AQUADRAFT C may be used with pesticides that either require or suggest the use of surfactants and/or ammonium sulfate as the recommended adjuvant.

## RATE RECOMMENDATIONS

AQUADRAFT C should be used at 2-5 oz/acre or 0.125 - 0.25% v/v.

## DIRECTIONS FOR USE

Other adjuvants may be added for deposition, retention and canopy penetration. Always read and follow the specific pesticide label directions, adjuvant suggestions, rates and mixing instructions.

AQUADRAFT C may be blended with liquid AMS. Rates may be adjusted for varied herbicides and weather conditions. As a tank mix adjuvant add AQUADRAFT C to the spray tank first before adding any other tank mix product, unless the tank mix pesticide(s) or additives direct otherwise.

## Mixing Instructions:

1. Fill tank 1/2 full of water and begin agitation.
2. Add the required amount of AQUADRAFT C while agitating.
3. Continue filling spray tank with water and add the tank mix components as directed on the pesticide label(s).
