

RACEREADY™ WHEAT STZ SEED TREATMENT

PRODUCT DESCRIPTION

RACEREADY™ WHEAT STZ, powered by ETHER™, is designed for use as a seed treatment on all soil types and may be used in band or in-furrow fertilizer applications. RACEREADY WHEAT STZ may be slurried. The mannanase enzyme releases sugars from polysaccharide chains. Lipase enzymes break down lipids in the soil.

It is a fully chelated solution recommended for the prevention and/or correction of zinc deficiency in all crops when used as part of a fertility program.

RATE RECOMMENDATIONS

Seed Treatment:

Corn: 4 fl oz per unit of seed. Sufficient water needs to be added to insure uniform coverage.

Wheat and Rice: 2 fl oz per 100 lbs of seed. Sufficient water needs to be added to insure uniform coverage.

In-furrow or Banded:

Field and Row Crops: 2 fl oz per acre in-furrow or banded either as a stand alone or in combination with liquid NPK starter fertilizers at planting or 2 fl oz per acre banded in the strip till not more than 2 weeks before planting.

Potato: 4-6 fl oz per acre in-furrow or banded either as a stand alone or in combination with liquid NPK starter fertilizers.

DIRECTIONS FOR USE

RACEREADY WHEAT STZ is compatible with most fungicides and insecticide seed treatments and may be mixed with and applied at the same time, however, it may also be applied as an overtreatment if preferred. This product can be mixed with most seed treatments that have a neutral pH range (5 to 9) as well as with water carrier solutions.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from heat, direct sunlight and incompatible materials. Best stored in an enclosed building capable of maintaining temperature below 110°F. Follow first in, first out inventory management practices. Dispose of contents and container in accordance with local, state and federal laws and regulations.

Maximum storage temperature: 110° F.
